CUMULATIVE IMPACT · 2022 TO 2026 (YEAR TO DATE)

Roots, gardens and neighbors

Land stewardship, farming and education on 722 acres in Cazadero, West Sonoma County, California. Our neighbors come first: the families, schools and small towns of the lower Russian River. Figures run through October 26, 2026.

HEADLINE NUMBERS

722 acres
on 4 parcels, stewarded since 2019

300+
redwoods and sequoias planted with the Archangel Ancient Tree Archive

~600
local students hosted with SEEC, 2024 to 2026[1]

5,400+ lbs
of fresh produce shared with our community since 2024[2]

~3,750 lbs
of produce delivered to the Cazadero General Store, 2024 and 2025[2]

~2,250
newsletter subscribers

TREES AND LAND

1,295
trees received from Archangel: 300 in 2022 and 995 redwoods in 2023[3]

83,000
native trees planted by partner WellKind in Guatemala, 2023 and 2024[4]

48
tree planters trained (2023)

10 + 10
acres of cover crop and of mulching on our Zero Foodprint Restore project, reported complete (2026)

46 acres
prepared for prescribed grazing with virtual fencing (2026)

1,000 sq ft
tree nursery today[5]

COMMUNITY AND LEARNING

3,130
hours of farming, 2024 and 2025[6]

80
neighbors at 2023 roundtables

90+
Creative Essence and retreat participants, 2023 to 2025[7]

MILESTONES BY YEAR

- 2022: Archangel Ancient Tree Archive partnership began; first 300 trees and a 100 sq ft temporary nursery; 1 workshop.
- 2023: nursery grew to 1,500 sq ft with 1,000+ trees; 20+ coast redwoods and 50 oaks planted; 48 tree planters trained; beaver dam analog built; emergency radio repeater and 3 GMRS radios for neighbors; Hippocrates tree planted; first holiday auction; 3 workshops.
- 2024: a little over an acre of gardens built with a USD 20,000 Allen grant; 2,322 lbs of produce shared, including 1,654 lbs to the Cazadero General Store; about 180 SEEC students; SEEC EE Pathways grant awarded; holistic grazing began; 30 UC professors and professionals gathered on climate resilience.
- 2025: gardens in their second full season; about 220 SEEC students, our largest year so far, including about 40 from Guerneville School; about 3,000 lbs of produce shared (estimated).
- 2026 to date: about 200 students from 5 partner schools, including 2 overnight campouts; EE Pathways funding renewed for 2026 to 2027; first produce donation to Ceres Community Project (95 lbs plus 8 dozen

eggs, valued at USD 330, October 20); first West County Community Services delivery scheduled for October 27; Zero Foodprint Restore work underway, with a goal of 2,397+ trees and shrubs across 141 acres by May 2027.

Method: totals add yearly figures only where they are clearly separate counts (students, produce, farming hours, trees received, participants). Point-in-time figures (acres, nursery size, subscribers) are not summed. 2026 is year to date as of October 26, 2026.

[1] About 180 (2024) + 220 (2025) + 200 (2026). Excludes the 2023 Guerneville field trip (20 students, 7 adults).

[2] 2024 garden log: 2,322 lbs shared, 1,654 lbs to the Cazadero General Store. 2025 figures are estimates (about 3,000 lbs shared, about 2,100 lbs to the store). 2026 adds 95 lbs donated to Ceres. Sum rounded down; an earlier draft gave 5,300+ for 2024 and 2025 only.

[3] Separate shipments by year. The 2023 nursery count (1,000+ trees) may include 2022 trees, so this is trees received, not trees in the ground.

[4] WellKind is a partner program in Guatemala, reported separately from local Sonoma impact: 52,000 trees (2023) + 31,000 (2024); also 5 springs reforested, 317 indigenous families trained, 71 ha in the Lake Atitlan region. 2025 WellKind figures are pending.

[5] 2023 records list a 1,500 sq ft nursery; 2024 and 2025 reports list 1,000 sq ft. We use the more conservative current figure.

[6] 1,380 hours (2024) + about 1,750 (2025, estimated). 2026 hours not yet reported.

[7] 25 (2023 Creative Essence) + 30 (2024 Creative Essence) + 35+ (2025, estimated).
